## Google Application Enabled School

Google Apps for Work

Communication | Collaboration | Cloud Storage | Schedule Management | Security

Google Apps for Education is a set of applications that can be used, for free, as a school-wide software solution to provide cloud-based access to collaborative teaching and learning. Jain Public School is the first school in Chennai to be a Google -application enabled school. G- Suite and various technological applications are successfully implemented in school processes.

## The Climate Reality Project

The Climate Reality Project India, is the Indian branch of Nobel Laureate and former Vice President Al Gore's climate change leadership program founded in June 2006. Climate Reality's mission is to educate the public about the harmful effects of climate change and to work towards solutions at a grassroots level worldwide. The School has successfully collaborated and trained teachers to become sustainability leaders and take forward sustainable education to the learners.

## BLESSINGS.....

**Mr. SUDHIR KUMAR SURANA (LATE)**

Founder Chairman

Amarprakash Foundation Education Trust

### Greetings!

It is a moment of pride as I watch Jain Public School march successfully into the next academic year. Success to different people may mean different things. The world today is filled with people who are successful in the academic and monetary frontier. Yet, there seems to be a dark cloud threatening to become the shroud that envelopes our mother earth. A closer look reveals the reason – lack of values and compassion.

At Jain Public School, we are committed to reverse this situation. As we imbibe internationalism, students are sensitized to different cultures and practices.

The school strives to inculcate the values of love, care and compassion in the minds of the young leaders by series of well-planned SEWA – Community service programmes.

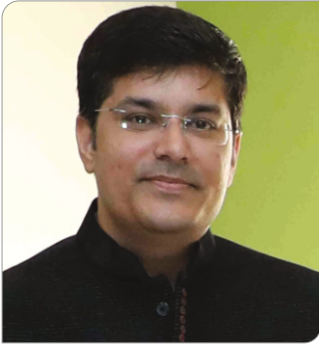

Innovations distinguishes a leader from the entirety. Parading ahead, JPS has essayed to engineer leaders charged with responsibility, who are sure to accept that they are the cause and the solution of the matter. Our constant aim has been and shall continue to be to produce compassionate leaders with deeply rooted values. To ensure that the students aren't alienated from our culture and tradition, all religious festivals are celebrated at school. These celebrations witness active participation from students.

The school also makes it a point to sensitize the students to be compassionate not just to their fellow human beings but to all co-inhabitants of Earth. These values are not merely preached in isolation; care is taken to interweave these values in the curriculum.

We look forward to produce better human beings, people who would make this world better and safer for everyone around them in the coming years.

## FROM THE MANAGEMENTS' DESK

### **Mr. AASHISH KUMAR SURANA**

**Managing Trustee  
Amarprakash foundation Educational Trust**

#### **Greetings!**

Dear Students, Parents, and Faculty Members,

Our school's motto is "school for leaders," and this is not just a slogan, but a mission that we take seriously. Our goal is to develop a generation of leaders who are equipped to make a positive impact on the world, and to do that, we must provide our students with the best possible education and opportunities.

We believe that leadership is not a position or a title, but a mindset and a set of skills that can be learned and developed. Our curriculum is designed to help students develop critical thinking, problem-solving, communication, and collaboration skills, which are essential for success in any field.

We also believe that leadership is not just about achieving personal success, but about using one's talents and abilities to serve others and make a difference in the world. That's why we emphasize character development and community service, and encourage our students to be ethical and responsible individuals who are committed to making the world a better place.

At our school, we strive to create a culture of excellence, where students are challenged and supported to achieve their full potential. We recognize that each student is unique and has their own strengths and passions, and we are committed to helping each student find their path and pursue their dreams.

As we look to the future, we are excited about the possibilities that lie ahead. We are constantly seeking new ways to innovate and improve our curriculum and programs, and we are committed to staying at the forefront of education and preparing our students for success in a rapidly changing world.

We are proud of the achievements of our students and alumni, who have gone on to make significant contributions in their fields and communities. We are confident that our current students will continue this legacy and make a positive impact on the world.

I am a visionary, a dreamer, is all that Aashish Surana thinks and talks about.

## FROM THE DESK OF PRINCIPAL

**Tr. SARAVANAN THIYAGARAJAN**

Teacher, Trainer & Transformer.

“Great minds discuss ideas; average minds discuss events; small minds discuss people.”

**Eleanor Roosevelt**

With a vision and aim of creating great minds through educating the budding minds of our future so they could grow up to become responsible citizens of the society. A Nation that produces a generation of talented and hardworking youth marches ahead on the path of progress. However creating quality citizens are no easy task and cannot be achieved overnight and single handedly.

So with the team of efficient and dedicated teachers, who known to be the second parents of our children are continuously in the verge of establishing a positive teacher student relationship which helps to yield a beautiful environment in the classroom. A teacher is also a guide, a friend, a counsellor and also like a gardener who waters the tiny flowers called children.

My experience as a Principal, have shown me the path to ecstasy. Whenever I get time, I could not resist myself to be attached with my children. They are not just part of my life in fact they are my life. I have yet to learn many things from their innocence, creativity, dynamism, out of box thinking. This helps me in improving myself better than the last day.

With the growing technology and changing time, we have introduced many technically advanced programmes like Google for education, Edexcel, Educom, Tablets. But I firmly believe that technology cannot be a substitute for the teacher. In order to run the technology effectively and to make it relevant to the classroom learnings, the teachers' presence is mandatory.

My goal is to work with all factions of our community and ensure the best possible outcome.

We cannot become what we need to be by remaining what we are.

**Max de Pree**

Yes, we JPS ... Did it....
